

NetSuite QuickStart for Wholesale Distribution

Fixed Price and Rapid Go-Live Cloud ERP to Accelerate Your Business Growth

Key Benefits

- **Fixed fee and scope for rapid deployment** enables you to be live with ERP typically within three months.
- **Monitor and manage your entire business** with customisable dashboards and built-in wholesale distribution best practices.
- **Streamline order-to-shipment and shipment-to-revenue** with inventory and order fulfilment capabilities.
- **Gain a real-time, 360-degree customer view** with one complete database across CRM, marketing, selling, service and support.
- **Expand your business easily** to new sales channels, products and international markets with omnichannel commerce.

“DID WE NEED NETSUITE WHEN WE WERE DOING 20 OR 30 INVOICES A DAY? NO, WE SURVIVED. BUT TO GROW 176% IN 12 MONTHS WITH NO SLOWDOWN AS WE DID, WE NEEDED NETSUITE. JUST AS WE’LL NEED IT TO GROW TO 500 OR 1000 INVOICES PER DAY IN THE FUTURE.”

BioPak

NetSuite QuickStart provides an accelerated implementation of the No. 1 cloud ERP solution for wholesale distributors. Using NetSuite, distributors can run their businesses on a single, unified suite, reducing IT costs and gaining comprehensive, real-time visibility across their organisation. For a fixed fee and scope, you’ll get rapid deployment, typically within three months, for up to 10 users. Scale and give your business the edge with the industry’s leading solution.

Key Features

With implementation by NetSuite Professional Services experts, you accelerate your time to market and realise cost savings and fast ROI. NetSuite QuickStart comes loaded with core functions for a wholesale distribution ERP solution, including:

Company Management: Complete Finance/Accounting in a single integrated cloud solution supporting up to 10 users and three subsidiaries on a single ledger.

CRM: Seamless customer management across the entire customer lifecycle from lead through to opportunity, sales order, fulfilment, renewal, upsell, cross-sell and support.

Order: Fast track order-to-cash by eliminating manual bottlenecks and errors, while establishing a smooth flow from sales quote to approved order, successful order to fulfilment, and timely invoicing to payment.

Inventory: Streamline procurement, reduce inventory overhead and turn your inventory more quickly through location-based stocking strategies.

Manufacturing: Readily manage the build process for production work orders, with flexibility to choose from several methods to replenish inventory levels of stock sub-assemblies and finished goods.

Reporting: Create meaningful reports with easy-to-use tools, monitor the latest results as part of everyday activities, identify root causes of problems and take corrective action. Real-time information is delivered with personalised dashboards to monitor the KPIs important to any role.
