### Non-GAAP Financial Measures

The Company's stated results include certain non-GAAP financial measures, including non-GAAP operating income/(loss), net income/(loss), weighted average shares outstanding, and net income/(loss) per share. Non-GAAP operating income/(loss) and Non-GAAP net income/(loss) excludes expenses related to stock-based compensation expense, amortization of intangible assets and transaction costs for business combinations. Non-GAAP operating income/(loss) and Non-GAAP net income/(loss) excludes these expenses as they are often excluded by other companies to help investors understand the operational performance of their business, and in the case of stock-based compensation, can be difficult to predict. The Company believes these adjustments provide useful comparative information to investors.

The Company considers these non-GAAP financial measures to be important because they provide useful measures of the operating performance of the Company and are used by the Company's management for that purpose. In addition, investors often use measures such as these to evaluate the operating performance of a company. Non-GAAP results are presented for supplemental informational purposes only for understanding the Company's operating results. The non-GAAP results should not be considered a substitute for financial information presented in accordance with generally accepted accounting principles, and may be different from non-GAAP measures used by other companies.

#### Use of Non-GAAP Financial Measures

To supplement our condensed consolidated financial statements presented on a GAAP basis, NetSuite uses non-GAAP measures of operating income / (loss), net income / (loss), weighted average shares outstanding and net income / (loss) per share, which are adjusted to exclude stock-based compensation expense, amortization of acquisition-related intangible assets and transaction costs for business combinations and includes dilutive shares where applicable. We believe these adjustments are appropriate to enhance an overall understanding of our past financial performance and also our prospects for the future. These adjustments to our current period GAAP results are made with the intent of providing both management and investors a more complete understanding of NetSuite's underlying operating results and trends and our marketplace performance. The non-GAAP results are an indication of our baseline performance that are considered by management for the purpose of making operational decisions. In addition, these non-GAAP results are the primary indicators management uses as a basis for our planning and forecasting of future periods. The presentation of this additional information is not meant to be considered in isolation or as a substitute for operating loss, net loss or basic and diluted net loss per share prepared in accordance with generally accepted accounting principles in the United States. Non-GAAP financial measures are not based on a comprehensive set of accounting rules or principles and are subject to limitations.

- (a) Stock-based compensation is a non-cash expense accounted for in accordance with FASB ASC Topic 718. Amortization of intangible assets and transaction costs related to business combinations resulted principally from mergers and acquisitions. While a large component of our expense in certain periods, we believe investors may want to exclude the effects of these items in order to compare our financial performance with that of other companies and between time periods.
- (b) These securities are anti-dilutive on a GAAP basis as a result of the Company's net loss, but are considered dilutive on a non-GAAP basis in periods where the Company has reported positive non-GAAP earnings.
